

CONTENTS

1. Introduction	1
2. Pilot Plants and Models	5
3. The Principle of Similarity	12
4. Dimensional analysis	27
5. Differential Equations	43
6. The Regime Concept	63
7. Similarity Criteria and Scale Equations	74
8. Extrapolation	98
9. Boundary Effects	105
10. Ducts and Flow Passages	112
11. Filters	124
12. Heat- transfer Equipment	131
13. Packed Towers	151
14. Mixing Equipment	173
15. Chemical Reactors	182
16. Furnaces and Kilns	197
17. Miscellaneous Equipment	226
18. Corrosion	244
19. Analogue Models	249
20. Index	299
