Preface XV

- 1 What is Trouble Shooting? 1**
 - 1.1 Characteristics of a Trouble-Shooting Problem 2
 - 1.1.1 Similarities among TS Problems 2
 - 1.1.2 Differences between TS Problems 3
 - 1.2 Characteristics of the Process Used to Solve Trouble-Shooting Problems 3
 - 1.2.1 How the Type of Problem Guides the TS Process or Strategy
 - 1.2.2 Five Key Elements Common to the TS Process 4
 - 1.3 Self-Test and Reflections 5
 - 1.4 Overview of the Book 9
 - 1.5 Summary 9
 - 1.6 Cases to Consider 9

- 2 The Mental Problem-Solving Process used in Trouble Shooting 17**
 - 2.1 Problem Solving 19
 - 2.2 Trouble Shooting 23
 - 2.2.1 Considerations when Applying the Strategy to Solve Trouble-Shooting Problems 23
 - 2.2.2 Problem-Solving Processes Used by Skilled Trouble Shooters 24
 - 2.2.3 Data Collection and Analysis: Approaches Used to Test Hypotheses 25
 - 2.3 Overall Summary of Major Skills and a Worksheet 25
 - 2.3.1 Getting Organized: the Use of a Trouble-Shooter's Worksheet 25
 - 2.3.2 Feedback about your Trouble Shooting 29
 - 2.4 Example Use of the Trouble-Shooter's Worksheet 35
 - 2.5 Summary 40
 - 2.6 Cases to Consider 40

- 3 Rules of Thumb for Trouble Shooting 43**
 - 3.1 Overall 43
 - 3.1.1 General Rules of Thumb and Typical Causes 43
 - 3.1.2 Corrosion as a Cause 45

3.1.3	Instruments, Valves and Controllers	46
3.1.4	Rules of Thumb for People	47
3.1.5	Trouble-Shooting Teams	48
3.2	Transportation Problems	51
3.2.1	Gas Moving: Pressure Service	52
3.2.2	Gas Moving: Vacuum Service	53
3.2.3	Liquid	54
3.2.4	Solids	56
3.2.5	Steam	58
3.3	Energy Exchange	58
3.3.1	Drives	58
3.3.2	Thermal Energy: Furnaces	60
3.3.3	Thermal Energy: Fluid Heat Exchangers, Condensers and Boilers	61
3.3.4	Thermal Energy: Refrigeration	65
3.3.5	Thermal Energy: Steam Generation	66
3.3.6	High-Temperature Heat-Transfer Fluids	66
3.4	Homogeneous Separation	67
3.4.1	Evaporation	67
3.4.2	Distillation	69
3.4.3	Solution Crystallization	72
3.4.4	Gas Absorption	73
3.4.5	Gas Desorption/Stripping	75
3.4.6	Solvent Extraction, SX	76
3.4.7	Adsorption: Gas	77
3.4.8	Adsorption: Liquid	77
3.4.9	Ion Exchange	77
3.4.10	Membranes: Reverse Osmosis, RO	79
3.4.11	Membranes: Nanofiltration	79
3.4.12	Membranes: Ultrafiltration, UF, and Microfiltration	79
3.5	Heterogeneous Separations	79
3.5.1	Gas-Liquid	80
3.5.2	Gas-Solid	81
3.5.3	Liquid-Liquid	82
3.5.4	Gas-Liquid-Liquid Separators	84
3.5.5	Dryer for GS Separation	85
3.5.6	Screens for Liquid Solid Separation or Dewatering	85
3.5.7	Settlers for LS Separation	86
3.5.8	Hydrocyclones for LS Separation	86
3.5.9	Thickener for LS Separation	86
3.5.10	Sedimentation Centrifuges	87
3.5.11	Filtering Centrifuge	87
3.5.12	Filter for LS Separation	88
3.5.13	Screens for Solid-Solid Separation	88
3.6	Reactor Problems	88
3.6.1	PFTR: Multitube Fixed-Bed Catalyst, Nonadiabatic	89

3.6.2	PFTR: Fixed-Bed Catalyst in Vessel: Adiabatic	91
3.6.3	PFTR: Bubble Reactors, Tray Column Reactors	93
3.6.4	PFTR: Packed Reactors	94
3.6.5	PFTR: Trickle Bed	94
3.6.6	PFTR: Thin Film	96
3.6.7	STR: Batch (Backmix)	96
3.6.8	STR: Semibatch	98
3.6.9	CSTR: Mechanical Mixer (Backmix)	99
3.6.10	STR: Fluidized Bed (Backmix)	101
3.6.11	Mix of CSTR, PFTR with Recycle	106
3.6.12	Reactive Extrusion	106
3.7	Mixing Problems	107
3.7.1	Mechanical Agitation of Liquid	107
3.7.2	Mechanical Mixing of Liquid–Solid	108
3.7.3	Solids Blending	108
3.8	Size-Decrease Problems	109
3.8.1	Gas Breakup in Liquid: Bubble Columns	109
3.8.2	Gas Breakup in Liquid: Packed Columns	109
3.8.3	Gas Breakup in Liquid: Agitated Tanks:	110
3.9	Size Enlargement	110
3.9.1	Size Enlargement: Liquid–Gas: Demisters	110
3.9.2	Size Enlargement: Liquid–Liquid: Coalescers	110
3.9.3	Size Enlargement: Solid in Liquid: Coagulation/Flocculation	111
3.9.4	Size Enlargement: Solids: Tableting	111
3.9.5	Size Enlargement: Solids: Pelleting	111
3.9.6	Solids: Modify Size and Shape: Injection Molding and Extruders	112
3.9.7	Coating	126
3.10	Vessels, Bins, Hoppers and Storage Tanks	126
3.11	“Systems” Thinking	127
3.12	Health, Fire and Stability	130
3.12.1	Individual Species	130
3.12.2	Combinations	131
4	Trouble Shooting in Action: Examples	133
4.1	Case #3: The Case of the Cycling Column	133
4.2	Case #4: Platformer Fires	138
4.3	Case #5: The Sulfuric Acid Pump	141
4.4	Case #6: The Case of the Utility Dryer	144
4.5	Case #7: The Case of the Reluctant Crystallizer	
4.6	Reflections about these Examples	162
5	Polishing Your Skills: Problem-Solving Process	165
5.1	Developing <i>Awareness</i> of the Problem-Solving Process	165
5.1.1	Some Target Skills	166
5.1.2	The TAPPS Roles: Talker and Listener	166

5.1.3	Activity 5.1: (35 minutes)	168
5.1.4	Feedback, Self-Assessment	172
5.2	Strategies	173
5.2.1	Some Target Skills	174
5.2.2	The Extended TAPPS Roles: Talker+ and Listener+	175
5.2.3	Activity 5.2: (time 35 minutes)	176
5.2.4	Feedback, Self-assessment	179
5.3	Exploring the “Context”: what is the <i>Real Problem</i> ?	180
5.3.1	Example	180
5.3.2	Activity 5-3	181
5.4	Creativity	183
5.4.1	Some Target Skills	183
5.4.2	Example: Case #10: To dry or not to dry! (based on Krishnaswamy and Parker, 1984)	186
5.4.3	Activity 5-4	190
5.4.4	Feedback, Self-Assessment	191
5.5	Self-Assessment	191
5.5.1	Some Target Skills	192
5.5.2	Activity for Growth in Self-Assessment	192
5.5.3	Feedback About Assessment	193
5.6	Summary and Self-Rating	194
6	Polishing Your Skills: Gathering Data and the Critical-Thinking Process	195
6.1	Thinking Skills: How to Select Valid Diagnostic Actions	196
6.1.1	How to Select a Diagnostic Action	196
6.1.2	Select from among a Range of Diagnostic Actions	196
6.1.3	More on Gathering and Interpreting Data	200
6.1.4	Summary	209
6.2	Thinking Skill: Consistency: Definitions, Cause–Effect and Fundamentals	209
6.2.1	Consistent Use of Definitions	210
6.2.2	Consistent with How Equipment Works: Cause → Effects: Root Cause-Symptoms	212
6.2.3	Consistent with Fundamental Rules of Mathematics and English	217
6.2.4	Consistent with Fundamental Principles Of Science: Conservation of Mass, Energy, High to Low Pressure, Properties of Materials	218
6.2.5	Consistent with Experience	218
6.2.6	Summary	219
6.3	Thinking Skills: Classification	219
6.3.1	Classify the Starting Information	219
6.3.2	Classifying Ideas from Brainstorming	220
6.4	Thinking Skills: Recognizing Patterns	221
6.4.1	Patterns in the Symptoms	221

6.4.2	Patterns in the Evidence	223
6.5	Thinking Skill: Reasoning	223
6.5.1	Step 1: Classify the Information	224
6.5.2	Step 2: Write the Conclusion	225
6.5.3	Step 3: Identify the Context	225
6.5.4	Step 4: Clarify the Meaning of the Terminology	226
6.5.5	Step 5: Consider the Evidence	227
6.5.5a	Identify the Evidence	227
6.5.5b	Check for Consistency	227
6.5.5c	Which Evidence is Pertinent?	228
6.5.5d	Diagram the Argument	229
6.5.6	Step 6: Formulate the Assumptions	230
6.5.7	Step 7: Assess the Quality of the Reasoning	230
6.5.8	Step 8: Assess the Strengths of the Counterarguments	232
6.5.9	Step 9: Evaluate the Consequences and Implications	232
6.5.10	Activity 6-14	232
6.6	Feedback and Self-Assessment	233
6.7	Summary	233
6.8	Exercises	234
7	Polishing Your Skills: Interpersonal Skills and Factors Affecting Personal Performance	237
7.1	Interpersonal Skills	237
7.1.1	Communication	237
7.1.2	Listening	238
7.1.3	Fundamentals of Interaction	239
7.1.4	Trust	240
7.1.5	Building on Another's Personal Uniqueness	243
7.2	Factors that Affect Personal Performance	244
7.2.1	Pride and Unwillingness to Admit Error	244
7.2.2	Stress: Low and High Stress Errors	245
7.2.3	Alienation and Lack of Motivation	249
7.2.4	"I Know Best!" Attitude	249
7.2.5	Tendency to Interpret	249
7.3	The Environment	253
7.4	Summary	253
7.5	Exercises and Activities	253
8	Prescription for Improvement: Put it all Together	259
8.1	Approaches to Polish Your Skill	259
8.1.1	Triad Activity	259
8.1.2	Individual Activity	262
8.2	Cases to Help you Polish Your Skill	263
8.2.1	Guidelines for Selecting a Case	263

	The Cases and Understanding the Choice of Diagnostic Actions for each Case	263
8.3	Summary	396
9	What Next?	397
9.1	Summary of Highlights	397
9.2	Reflection and Self-Assessment are Vital for the Development of Confidence	401
9.3	Going Beyond this Book: Setting Goals for Improvement	402
9.3.1	Prepare Yourself for Success	402
9.3.2	Use Reflection and Self-Assessment Effectively	403
9.4	Going Beyond this Book: Updating your Rules of Thumb and Symptom ← Cause Data for Process Equipment	403
9.5	Beyond this Book: Sources of Other Cases	403
	Literature References	405

I 1

CD Contents

Appendix A

Feedback about Experience with Process Equipment 411

Appendix B

Improving “Systems Thinking” 415

Appendix C

Feedback on the Cases in Chapters 1, 2 and 7 423

Appendix D

Coded Answers for the Questions Posed to Solve the Cases 435

Appendix E

Debrief for the Trouble-Shooting Cases 537

Appendix F

Other Tasks for the Skill-Development Activities in Chapter 5 565

Appendix G

Selected Responses to the Activities in Chapters 6 and 7 569

Appendix H

Data about “Causes” for Selected Process Equipment 573

Appendix I

Feedback about Symptoms for Selected Causes 579

Appendix J

Guide for Students: How You Can Get the Most from this Book 581

J-1 Getting Started: Get the Big Picture 581

J-2 Try a Trouble-Shooting Case where the Problem is Reasonably Well Defined 582

J-3 See How Others Handle a Case 591

J-4 Pause, Reflect on the Pretest, and Invest Time Polishing Specific Skills 591

J-5 Work your First Cases Starting with Case #19 591

J-6 Trouble Shooting on the Job 591

J-7 Summary 592
