

CONTENTS

| | |
|--|-----------|
| 1. CATALYST DESIGN: SELECTED TOPICS AND EXAMPLES | 1 |
| 1.1 Introduction | 2 |
| 1.2 Transport Considerations | 5 |
| 1.3 Extent of Catalyst Surface | 8 |
| 1.4 Catalyst Structure | 12 |
| 1.5 Intrinsic Activity and Selectivity | 18 |
| 1.6 Bifunctional Catalysis | 26 |
| 1.7 Catalyst Poisoning and Deactivation | 30 |
| 1.8 Concluding Remarks | 35 |
| References | 36 |
| | |
| 2. PROCESS HEAT-EXCHANGER DESIGN: QUALITATIVE FACTORS IN SELECTION AND APPLICATIONS | 41 |
| 2.1 Introduction | 42 |
| 2.2 Quantitative Aspects of Heat-Exchanger Design | 43 |
| 2.3 Problem Identification | 56 |
| 2.4 Uncertainty in Heat-Exchanger Design | 62 |
| 2.5 Flow Maldistribution | 64 |
| 2.6 Fouling in Heat Exchangers | 66 |
| 2.7 Summary | 68 |
| References | 68 |
| | |
| 3. ENERGY-EFFICIENT SEPARATION PROCESS DESIGN | 71 |
| 3.1 Introduction | 71 |
| 3.2 Energy Consumption of Separation Processes | 72 |
| 3.3 Separation-Energy Relationships | 75 |
| 3.4 Distillation Separations | 78 |
| 3.5 Extraction Separations | 84 |
| 3.6 Crystallization Separations | 87 |
| 3.7 Adsorption Separations | 90 |
| 3.8 Membrane Separations | 93 |
| 3.9 Alternate Methods | 95 |
| 3.10 Conclusions | 97 |
| References | 97 |

| | |
|---|------------|
| 4. PROCESS INTEGRATION | 101 |
| 4.1 Introduction | 102 |
| 4.2 Energy Usage and Efficiency in Separation | 102 |
| 4.3 Separation Process Economics | 105 |
| 4.4 Principles of Heat Integration | 109 |
| 4.5 Applications of Heat Integration | 116 |
| 4.6 Other Heat-Integration Advantages | 120 |
| 4.7 Conclusion | 120 |
| Acknowledgments | 121 |
| Nomenclature | 122 |
| References | 122 |
| Further Reading | 124 |
| | |
| 5. PROCESS SYNTHESIS: A MORPHOLOGICAL VIEW | 127 |
| 5.1 Introduction | 128 |
| 5.2 A View of Process Synthesis | 128 |
| 5.3 Some Key Process Synthesis Results | 137 |
| 5.4 Concluding Remarks | 142 |
| References | 142 |
| | |
| 6. PROCESS SYNTHESIS: SOME SIMPLE AND PRACTICAL DEVELOPMENTS | 147 |
| 6.1 Introduction | 149 |
| 6.2 Multicomponent Separation Sequences | 149 |
| 6.3 Heat-Exchanger Networks (HENs) | 168 |
| Acknowledgments | 253 |
| Nomenclature | 254 |
| References | 257 |
| | |
| 7. COMPUTER-AIDED DESIGN (CAD): ADVANCES IN PROCESS FLOWSHEETING SYSTEMS | 261 |
| 7.1 Introduction | 262 |
| 7.2 Comparison of Traditional Computer-Aided Design/Computer-Aided Manufacturing (CAD/CAM) Systems with Those for Process Design | 264 |
| 7.3 Computer Architecture for Steady-State Process Simulation | 269 |
| 7.4 Computing Environment for Computer-Aided Process Engineering | 276 |
| 7.5 Applications of Flowsheet Simulation | 279 |
| 7.6 Future Directions in Computer-Aided Process Engineering | 282 |
| 7.7 Summary | 284 |
| Acknowledgements | 285 |
| References | 285 |

| | | |
|------------|---|------------|
| 8. | INTEGRATION OF PROCESS DESIGN AND PROCESS CONTROL | 289 |
| 8.1 | Introduction | 290 |
| 8.2 | Historical Perspective | 290 |
| 8.3 | Examples of Systems with Poor Control Structure | 293 |
| 8.4 | Unique Nature of Chemical Process Control | 296 |
| 8.5 | Techniques for Integrating Process Design and Process Control | 297 |
| 8.6 | Summary | 318 |
| | Acknowledgments | 318 |
| | Nomenclature | 319 |
| | References | 320 |
| | | |
| 9. | SAFETY IN PROCESS AND PLANT DESIGN | 325 |
| 9.1 | Introduction | 326 |
| 9.2 | Legislative Aspects of Safety in Process and Plant Design | 326 |
| 9.3 | The Major Hazards | 327 |
| 9.4 | Loss Prevention at an Early Stage of the Design | 331 |
| 9.5 | Improving Plant Safety | 333 |
| 9.6 | Sample Use of Keywords | 334 |
| 9.7 | Good Practice and Design | 335 |
| 9.8 | Risk Analysis | 336 |
| 9.9 | Emergency Plans and the Loss-Prevention Program | 344 |
| | References | 355 |
| | Further Reading | 357 |
| | | |
| 10. | DEVELOPING DESIGN BASES FOR SYNTHETIC FUEL PLANTS | 365 |
| 10.1 | Introduction | 366 |
| 10.2 | Supply of Hydrocarbon Liquids | 367 |
| 10.3 | Dimension of a Synthetic Fuel Plant | 367 |
| 10.4 | Plant-Design Basis | 368 |
| 10.5 | Exxon Donor Solvent (EDS) Process Description | 369 |
| 10.6 | EDS Integrated Development | 370 |
| 10.7 | EDS Design Considerations – Mechanical | 371 |
| 10.8 | EDS Design Considerations – Process | 372 |
| 10.9 | Initial EDS Coal-Liquefaction Pilot-Plant (ECLP) Operation | 373 |
| 10.10 | Process Interactions | 374 |
| 10.11 | Changes Effected | 377 |
| 10.12 | Results | 378 |
| 10.13 | Future Challenges | 378 |
| | Acknowledgment | 380 |
| | References | 380 |
| | Further Reading | 381 |

| | |
|--|------------|
| 11. PROCESS AND PLANT DESIGN FOR FOOD AND BIOCHEMICAL PRODUCTION | 383 |
| 11.1 The Food and Drug Industry | 385 |
| 11.2 Food-Production Categories | 389 |
| 11.3 Pharmaceutical Products | 398 |
| 11.4 Process and Plant Design | 401 |
| 11.5 Special Design Considerations | 406 |
| 11.6 Pharmaceutical Processing Considerations | 414 |
| 11.7 Product Integrity | 415 |
| 11.8 Sanitary Considerations | 416 |
| 11.9 Food-Processing Unit Operations | 417 |
| 11.10 Unit Operations for Biochemical Production | 418 |
| 11.11 Overall Design Considerations | 419 |
| 11.12 Design of Unit Operations | 421 |
| 11.13 Modeling | 424 |
| 12.14 Unit-Operations Categories | 425 |
| 12.15 Conclusions | 437 |
| References | 437 |
| | |
| 12. CHEMICAL ENGINEERING IN ELECTRONIC MATERIALS PROCESSING: SEMICONDUCTOR REACTION AND REACTOR ENGINEERING | 457 |
| 12.1 Introduction | 458 |
| 12.2 Electronic Materials Processing | 461 |
| 12.3 Chemical Engineering Analysis | 472 |
| 12.4 Concluding Remarks | 488 |
| Acknowledgments | 491 |
| Nomenclature | 492 |
| References | 492 |
| Further Reading | 495 |
