

CONTENTS

PART 1: PROBLEM DEFINITION

1	Troubleshooting as a Skill in Its Own Right	3
2	The Nature of a Mature Operating Process	9
3	How Processes Develop Troubles: Dislocations, Calluses, and Syndromes	23
4	Role, Attitudes, and Language in Tram Troubleshooting	31
5	Completing Framing-in of the Problem	45

PART 2: PROCESS MODULES FOR VISUALIZING PROBLEMS OR CREATING SOLUTIONS

6	Classic Problem Elements: Fluid Mechanics	65
7	Classic Problem Elements: Distillation and other Fractionation Systems	95
8	Classic Problem Elements: Control and Process Dynamics	141
9	Classic Problem Elements: Nonlinear Phase Equilibria	178
10	Classic Problem Elements: Homogeneous Reaction Systems	203
11	Classic Problem Elements: Heterogeneous Reaction Systems	240
12	Classic Problem Elements: Trace Chemistry	284

PART 3: FINISHING THE JOB

13	Diagnostic Aids: Seeing the Unseen	303
14	Thinking Metaphorically	310
15	Turning the Tables: Making Phenomenology Work for You	317
16	Safety and Health: A “Must” with a Price	328
17	The Friendly Arts of Persuasion	354
18	Summing Up	357
