

**CENTENTS**

1. Diffusion and solubility in liquids	6
2. Reaction kinetics	22
3. Absorption into quiescent liquids	30
4. Experiments on the absorption of gases into quiescent liquid	71
5. Absorption into agitated liquids	96
6. Reaction in the bulk of the liquid	152
7. Model experiments on absorption into agitated liquids	176
8. Absorption in packed and plate columns	183
9. Characteristics of absorption equipment	206
10. Some examples of reactions	238
11. Desorption of gases	264
12. Index	268
