

CONTENTS

1. Current State of Supercritical Fluid Science and Technology	1
PHASE BEHAVIOR AND TRANSPORT PROPERTIES	
2. High-Pressure Vapor-Liquid Equilibria in Carbon Dioxide and 1-Alkanol Mixtures	10
3. Phase Behavior of Supercritical Fluid-Entrainer Systems	34
4. Three-Phase Behavior in Binary Mixtures of Near-Critical Propane and Triglycerides	46
5. Multiphase Equilibrium Behavior of a Mixture of Carbon Dioxide, 1-Decanol, and <i>n</i> -Tetradecane	55
6. Group Contribution Method for Estimating the Solubility of Selected Hydrocarbon Solutes in Supercritical Carbon Dioxide	66
7. Equation-of-State Analysis of Phase Behavior for Water-Surfactant-Supercritical Fluid Mixtures	74
8. Diffusion in Liquid and Supercritical Fluid Mixtures	92
9. Viscosity of Polymer Solutions in Near-Critical and Supercritical Fluids: Polystyrene and <i>n</i> -Butane	104
10. Thermophysical Properties of Natural Gas Mixtures Derived from Acoustic Cavity Measurements	121
MOLECULAR INTERACTIONS AND SIMULATIONS	
11. Competitive Energetic and Entropic Effects Describing Solvation in Near-Critical Solutions	134
12. Chemical Potentials in Ternary Supercritical Fluid Mixtures	149
13. Aggregation of Methanol in Supercritical Fluids: A Molecular Dynamics Study	158
14. Hydrogen Bonding of Simple Alcohols in Supercritical Fluids: An FTIR Study	175
15. Adsorption from Supercritical Fluids	188
16. Spectroscopic Investigations of Reactions in Supercritical Fluids: A Review	201
17. Fluorescence Spectroscopy Study of Alcohol-Solute Interactions in Supercritical Carbon Dioxide	220
18. Effects of Specific Interactions in Supercritical Fluid Solutions: A Chromatographic Study	228
APPLICATIONS	
19. Applications of Supercritical Fluids in the Controlled Release of Drugs	238
20. Dynamic Fluorescence Quenching in Reverse Microemulsions in Propane	258
21. Light Scattering Study of Polymer Network Formation in a Supercritical Diluent	271
22. Simulation and Optimization in Supercritical Fluid Chromatography	281
23. Supercritical Extraction of Organic Components from Aqueous Slurries	294

24. Kinetic Model for Wet Oxidation of Organic Compounds in Subcritical and Supercritical Water	305
25. Oxidation Processes in the Separation of Solids from Supercritical Water	314
26. Removal of Heteroatoms from Organic Compounds by Supercritical Water	327
27. Effect of Gas Density on Holdup in a Supercritical Fluid Bubble Column	338
28. Production of Mesophase Pitch by Supercritical Fluid Extraction	347
29. Kinetics of Supercritical Fluid Extraction of Coal: Physical and Chemical Processes	363
30. Depolymerization Reactions of <i>cis</i> -Polyisoprene and Scrap Rubber in Supercritical Toluene	380
