

CONTENTS

PREFACE	xiii
1 SOLVENT MICROEXTRACTION: COMPARISON WITH OTHER POPULAR SAMPLE PREPARATION METHODS	1
1.1 Introduction / 1	
1.2 Comparison of Sample Preparation Methods / 2	
1.2.1 Liquid-Liquid Extraction / 3	
1.2.2 Liquid-Solid Extraction / 5	
1.2.3 Headspace Extraction / 6	
1.2.4 Solid-Phase Microextraction / 8	
1.2.5 Solvent Microextraction / 9	
1.3 Summary / 13	
References / 14	
2 BASIC MODES OF OPERATION FOR SOLVENT MICROEXTRACTION	19
2.1 Basic Principles of SME / 19	
2.1.1 Introduction / 19	
2.1.2 Comparison of Classical Solvent Extraction and SME / 20	

- 2.2 Extraction Modes / 21
 - 2.2.1 Direct-Immersion Modes / 22
 - 2.2.2 Headspace Modes / 30
 - 2.2.3 Static vs. Dynamic Extraction Modes / 31
- 2.3 Solvents / 32
 - 2.3.1 General Rules for Choosing a Solvent / 32
 - 2.3.2 Internal and Surrogate Standards / 34
- References / 34

3 THEORY OF SOLVENT MICROEXTRACTION

37

- 3.1 Introduction / 37
- 3.2 Thermodynamics / 37
 - 3.2.1 Phase Distribution: Fundamental Considerations / 37
 - 3.2.2 Solvation and Solvent Selection / 40
 - 3.2.3 Octanol–Water Partition Coefficients and Henry’s Law Constants / 41
 - 3.2.4 Temperature and Salt Effects / 41
 - 3.2.5 Solute Equilibria and Speciation: pH and Back-Extraction / 42
 - 3.2.6 Dissolution and Evaporation of Solvent / 44
 - 3.2.7 Interfacial Adsorption / 45
- 3.3 Kinetics / 46
 - 3.3.1 Diffusive Mass Transfer and Fick’s Laws / 46
 - 3.3.2 Convective–Diffusive Mass Transfer / 47
 - 3.3.3 Two-Phase Kinetics / 49
 - 3.3.4 Three-Phase Kinetics / 56
- 3.4 Calibration Methods / 62
- 3.5 Summary / 63
- References / 64

4 PRACTICAL CONSIDERATIONS FOR USING SOLVENT MICROEXTRACTION

67

- 4.1 Introduction / 67
- 4.2 General Recommendations / 69
- 4.3 General Questions to Consider Before Performing an Analysis / 70
 - 4.3.1 What Are the Properties of the Chemicals to Be Extracted? / 70
 - 4.3.2 What Type of Sample Matrix Will Be Analyzed? / 71
 - 4.3.3 What Analytical Instrumentation Is Available? / 71
 - 4.3.4 What Is the Concentration of the Analyte? / 71

- 4.4 Choosing the SME Mode / 72
 - 4.4.1 Direct-Immersion Single-Drop Microextraction / 72
 - 4.4.2 Headspace Extraction / 72
 - 4.4.3 Dynamic Extraction / 74
 - 4.4.4 Hollow Fiber-Protected Microextraction / 75
 - 4.4.5 Dispersive Liquid-Liquid Microextraction / 76
- 4.5 Extraction Solvent / 76
- 4.6 Sample Volumes / 78
- 4.7 Syringe and Microdrop / 79
- 4.8 Chromatography and Detector Requirements / 80
- 4.9 Additional Extraction Parameters / 80
 - 4.9.1 Sample Agitation / 80
 - 4.9.2 Ionic Strength / 82
 - 4.9.3 Extraction Temperature and Extraction Time / 82
 - 4.9.4 Chemical Effects / 84
- 4.10 Calculation Examples for SDME / 84
- 4.11 Calculation Examples for DLLME and HFME / 87
- 4.12 Calculation Examples for the Effect of Ionic Strength on SDME / 89
- 4.13 Calculation Examples for HS-SDME / 91
- 4.14 Calculation Examples for the Effect of Ionic Strength on HS-SDME / 93
- 4.15 Calculation Examples for Static Headspace Extraction / 95
 - 4.15.1 Benzene: Static Headspace at Equilibrium / 95
 - 4.15.2 Naphthalene: Static Headspace at Equilibrium / 95
 - 4.15.3 Pyrene: Static Headspace at Equilibrium / 96
- 4.16 Calculation Examples for Solvent Solubility / 97
- References / 98

5 METHOD DEVELOPMENT IN SOLVENT MICROEXTRACTION 101

- 5.1 Introduction / 101
- 5.2 Extraction Mode Selection / 102
- 5.3 Static vs. Dynamic Extraction / 107
- 5.4 Selection of Manual vs. Automated Extraction / 108
- 5.5 Selection of Direct vs. Derivatization SME / 109
 - 5.5.1 Preextraction Derivatization / 110
 - 5.5.2 Concurrent Extraction-Derivatization / 111
 - 5.5.3 Postextraction Derivatization / 111
- 5.6 Extraction Solvent Selection / 113

- 5.7 Selection of Final Determination Method / 121
- 5.8 Selection of Extraction Optimization Method / 127
- 5.9 Optimization of Extraction Conditions / 129
 - 5.9.1 Optimization of Sample Volume / 129
 - 5.9.2 Optimization of Headspace Volume / 134
 - 5.9.3 Optimization of Solvent Volume / 137
 - 5.9.4 Optimization of Sample Flow Rate / 142
 - 5.9.5 Optimization of Extraction Time / 142
 - 5.9.6 Optimization of Sample and Solvent Temperature / 144
 - 5.9.7 Optimization of pH of Sample and Acceptor Solution / 145
 - 5.9.8 Optimization of Ionic Strength / 146
 - 5.9.9 Optimization of Agitation Method and Rate / 147
 - 5.9.10 Selection of Fiber Type and Length / 148
 - 5.9.11 Optimization of Dynamic Mode Parameters / 149
 - 5.9.12 Analytical Characteristics of SME Procedures and Quantitative Analysis / 150
- References / 155

6 APPLICATIONS

169

- 6.1 Introduction / 169
- 6.2 Gaseous Samples / 171
- 6.3 Liquid Samples / 174
- 6.4 Solid Samples / 176
- 6.5 Environmental Applications of SME / 178
 - 6.5.1 Volatile Hydrocarbons / 179
 - 6.5.2 Volatile Halocarbons / 183
 - 6.5.3 Volatile Polar Solvents / 185
 - 6.5.4 Nonpolar Semivolatile Compounds / 189
 - 6.5.5 Polar Semivolatile Compounds / 192
 - 6.5.6 Metal Ions, Metalloid Ions, and Organometallic Compounds / 196
 - 6.5.7 Other Inorganic Analytes / 198
 - 6.5.8 Pesticides / 198
- 6.6 Clinical and Forensic Applications of SME / 204
- 6.7 Application of SME in Food and Beverage Analysis / 211
- 6.8 Application of SME in the Analysis of Plant Material / 215
- 6.9 Application of SME in the Analysis of Consumer Products and Pharmaceuticals / 216

- 6.10 Outlook for Future Analytical Applications of SME / 220
- 6.11 Physicochemical Applications of SME / 223
 - 6.11.1 Study of Drug–Protein Binding / 224
 - 6.11.2 Study of Kinetics of the Partitioning Process / 226
 - 6.11.3 Study of Mechanistic Aspects of In-Drop Derivatization / 226
 - 6.11.4 Pharmacokinetic Studies Using SME / 228
 - 6.11.5 Determination of Octanol–Water Partition Coefficients by SME / 229
- References / 230

7 SME EXPERIMENTS

259

- 7.1 Introduction / 259
- 7.2 Recommended Experimental Conditions / 261
- 7.3 Determination of Gasoline Diluents in Motor Oil by HS-SDME / 264
 - 7.3.1 Experimental / 266
 - 7.3.2 Results and Discussion / 266
 - 7.3.3 Additional Experimental Recommendations / 267
- 7.4 Determination of BTEX in Water by HS-SDME / 267
 - 7.4.1 Experimental / 267
 - 7.4.2 Results and Discussion / 268
 - 7.4.3 Additional Experimental Recommendations / 268
- 7.5 Analysis of Halogenated Disinfection By-Products by SDME and HS-SDME / 269
 - 7.5.1 Experimental: HS-SDME / 269
 - 7.5.2 Experimental: SDME / 270
 - 7.5.3 Results and Discussion / 270
 - 7.5.4 Additional Experimental Recommendations / 271
- 7.6 Analysis of Volatile Organic Compounds by SDME and HS-SDME / 271
 - 7.6.1 Experimental: HS-SDME / 272
 - 7.6.2 Results and Discussion / 272
 - 7.6.3 Experimental: SDME / 276
 - 7.6.4 Additional Experimental Recommendations / 276
- 7.7 Analysis of Residual Solvents in Drug Products by HS-SDME / 276
 - 7.7.1 Experimental: Manual HS-SDME / 277
 - 7.7.2 Results and Conclusions / 277
 - 7.7.3 Experimental: Automated HS-SME / 277

7.7.4	Results and Conclusions /	277
7.7.5	Additional Experimental Recommendations /	281
7.8	Arson Accelerant Analyses by HS-SDME /	281
7.8.1	Experimental /	281
7.8.2	Results and Discussion /	282
7.8.3	Additional Experimental Recommendations /	284
7.9	Analysis of PAHs by SDME /	284
7.9.1	Experimental: SDME Extractions of PAHs from Aqueous Samples /	284
7.9.2	Results and Conclusions /	285
7.9.3	Experimental: HS-SDME Extractions of PAHs from Aqueous Solutions /	285
7.9.4	Results and Conclusions /	286
7.9.5	Additional Experimental Recommendations /	287
7.10	Determination of Acetone in Aqueous Solutions by Derivatization HS-SDME /	287
7.10.1	Experimental /	288
7.10.2	Results and Conclusions /	288
7.10.3	Additional Experimental Recommendations /	288
7.11	Determination of Pesticides in Soil by HF(2)ME /	288
7.11.1	Experimental /	289
7.11.2	Results and Discussion /	289
7.11.3	Additional Experimental Recommendations /	290
7.12	Determination of PAHs and HOCs by DLLME /	291
7.12.1	Experimental: Extraction of PAHs from Water /	291
7.12.2	Experimental: Extraction of HOCs from Water /	291
7.12.3	Results and Conclusions /	292
7.12.4	Additional Experiment Recommendations /	292
7.13	Dynamic Headspace and Direct Immersion Extractions (DY-SME) /	292
7.13.1	Experimental /	293
7.13.2	Results and Discussion /	294
7.13.3	Additional Experimental Recommendations /	295
	References /	295
