

CONTENTS

1. History of filtration	1
2. Theory and principles of filtration	30
3. Filtration objectives	46
4. Preparation for filtration	60
5. Filter media	73
6. Gravity filters	94
7. Pressure filters	101
8. Vacuum filters	138
9. Hydraulic presses and squeeze presses	168
10. Laboratory filters	179
11. Oil filters, oil expellers and oil separators	188
12. Water filtration	202
13. Sewage clarification and sewage sludge denaturing	221
14. Centrifugals and centrifuges	239
15. Air, gas and light filters	251
16. Auxiliary equipment	260
17. Typical filter applications and flow sheets	288
18. Testing and selection of equipment	297
19. Installation and operation	309
20. Index	341
