

CONTENTS

1. Introduction	1
2. Formulae relation N and J to the different separation factors Q	28
3. Errors In the calculation of numbers of stages and transfer units	48
4. The optimisation of counter – current forward and back extraction	57
5. Forward and back extraction using cross – current flow with recirculation	144
6. Linear equilibrium data	160
7. Conclusions	229
8. Further applications	240
9. Index	249
