

**CONTENTS**

1. Introduction	1
2. Pretreatment of solid / liquid mixtures	17
3. Filter media	39
4. Rapid settling systems	115
5. Moderate & slow settling systems	207
6. The clarification of liquids	299
7. Pastes, pulps, sludges & non-fluid systems	364
8. Liquid/ liquid separation	370
9. Practical applications of theoretical relationships	395
10. Appendix – equipment selection guide	484
11. Index	487
