

CONTENTS

1. The lobe- Sourirajan membrane: how it came about	1
2. Reverse osmosis: A new field of applied chemistry and chemical engineering	11
3. Application of synthetic membranes in water supply systems in Israel	63
4. Durability study of cellulose acetate reverse – osmosis membrane under adverse circumstances for desalting: laboratory investigation and its field application results	79
5. Membranes for salinity gradient energy production	89
6. Seawater reverse osmosis: the real experience	91
7. An electrical study of ion transport in cellulose acetate	101
8. Prediction method for the life of reverse-osmosis membranes	113
9. model and preliminary experiments on membrane fouling in reverse osmosis	131
10. Intrinsic membrane compaction and aqueous solute studies of hyperfiltration (reverse-osmosis) membranes using interferometry	147
11. Pressure drop across polarization layers in ultrafiltration	159
12. The effect of halogens on the performance and durability of reverse – osmosis membranes	171
13. High- flux cellulose acetate membranes	191
14. Highly anisotropic cellulose mixed – ester membranes for microfiltration	199
15. Permeability properties of cellulose triacetate hollow- fiber membranes for one- pass seawater desalination	223
16. The effect of phosphoric acid as a casting dope ingredient on reverse – osmosis membrane properties	235
17. Electron microscopy of cellulose acetate reburies – osmotic membranes by means of the improved replication method	247
18. Asymptotic solute rejection in reverse osmosis	253
19. Ultrastructure of asymmetric and composite membranes	267
20. Reverse – osmosis research in India: scope and potentialities	293
21. Thin – film composite reverse- osmosis membranes: origin, development, and recent advances	305
22. Poly (aryl ether) membranes for reverse osmosis	327
23. Transport of ions and water in sulfonated polysulfone membranes	351
24. Hollow – fiber reverse-osmosis composite membranes: process and properties	367
25. Poly (vinyl alcohol) membranes for reverse osmosis	383
26. Successful operation of a permasep permeator reverse- osmosis system on biologically active feed water	399
27. The effect of fluid management on membrane filtration	407
28. Index	449
