

CONTENTS

1. Dehydration of Aqueous Ethanol Mixtures by Extractive Distillation	1
2. Process Design Considerations for Extractive Distillation: Separation of Propylene-Propane	16
3. Extractive Distillation by Salt Effect	35
4. Rapid Screening of Extractive Distillation Solvents. Predictive and Experimental Techniques	46
5. Azeotropic Distillation Results from Automatic Computer Calculations	64
6. Prediction of Isobaric Vapor-Liquid Equilibrium Data for Mixtures of Water and Simple Alcohols	93
7. Demulsification of Crude Oils	108
8. Distillation Calculations with Nonideal Mixtures	122
9. Isobaric Vapor-Liquid Equilibrium in the Acetic Acid-Acetone System	136
10. Separation of Water, Methyl Ethyl Ketone, and Tetrahydrofuran Mixtures	148
11. Prediction of Vapor Composition in Isobaric Vapor-Liquid Systems Containing Salts at Saturation	159
Index	171
