

CONTENTS

1. Emerging technologies for drying	1
2. Atomization of spray – dryer feedstocks	11
3. Drying mechanism of adsorptive porous solids	77
4. Properties and simplifying assumptions for classical drying models	109
5. Drying of solids containing multicomponent moisture	145
6. Recent developments in paper drying	203
7. Through – drying of paper: A review	263
8. Analysis of electroosmotically enhanced sludge dewatering	301
9. Contact drying in mechanically agitated granular beds: A review of fundamentals	325
10. Index	367
