

CONTENTS

Preface	3
Chapter	
1. Introduction	1
2. Gases and vapors	16
3. Vaporization	23
4. Liquid mixtures	28
5. Distillation of liquid mixtures	33
6. Distillation of mixed vapors	38
7. Rate and capacity	42
8. Adsorption	46
9. Adsorption of mixed gases	67
10. Rate of adsorption	73
11. Recovery of adsorbed vapors	84
12. Adsorption apparatus for solvent recovery	90
13. Commercial activated carbon systems	121
14. Solvent recovery by condensation at constant pressure	139
15. Condensation with cooling water	146
16. Cooling with refrigeration	159
17. Heat of vaporization in the absence of gases	162
18. Vaporization in the presence of inert gases	166
19. The gas under natural circulation	171
20. The gas under forced circulation	175
21. Apparatus used in forced circulation of gases	192
22. Solvent recovery by compression and cooling	205
23. Solvent recovery by scrubbing	218
24. Scrubbing apparatus	236
25. Special absorbents	245
26. Extraction by solvents	255
27. Appendix	263
28. Index	267
