

CONTENTS

1. General considerations in liquid mixing	1
2. Power requirements in liquid mixing	29
3. The scale – up of liquid mixing systems	50
4. Operating characteristics of liquid mixing systems	66
5. The purging of stirred tank systems	109
6. Stirred tank reactors	122
7. Heat transfer in stirred tanks	147
8. The scale – up of heat transfer and chemical reaction processes in stirred tanks	187
9. Liquid – liquid extraction in stirred towers and tanks	207
10. The agitation of non- Newtonian liquids in stirred tanks	241
11. Auxiliary equipment and materials of construction for stirred tanks	270
12. Index	315
