

**660.284298 CRY**

## **CONTENTS**

1. Fundamentals of crystallization	1
2. Interaction between balances, processes, and product quality	79
3. Design of crystallizers and crystallization processes	215
4. Control of crystallizers	327
5. Reaction crystallization	359
6. "Tailor – made additives" and impurities	401
7. Crystallization from the melt	459
8. Thermal analysis and economics of processes	539
9. Appendix	563
10. Notation	619
11. Bibliography and references	631
12. Substance index	667
13. Subject index	679
