

660.284 2 AME**CONTENTS**

| | |
|--|-----|
| 1. Microencapsulation : A brief history and introduction | 1 |
| 2. Encapsulation by coacervation | 21 |
| 3. Encapsulation of spherical particles as a characteristic of gelatin fractions | 39 |
| 4. Encapsulated vegetable fats in cattle feeds | 57 |
| 5. Liquid / liquid extractions carried out with microcapsule - packed columns | 71 |
| 6. Liquid – crystal containing light sensitive microcapsules | 81 |
| 7. Microencapsulated pesticides | 89 |
| 8. Artificial cell and microcapsules : comparison of structural and functional differences | 95 |
| 9. Microencapsulation by vapor deposition | 103 |
| 10. Microencapsulation of activated charcoal and its biochemical applications | 115 |
| 11. Microencapsulation processes in modern business forms | 127 |
| 12. Air suspension encapsulation of moisture – sensitive particles using aqueous systems | 145 |
| 13. Physical methods for preparing microcapsules | 155 |
| 14. Microcapsules in veterinary medicine : A regulatory view | 165 |
| 15. Index | 173 |
