

CONTENTS

1. Introduction and basic concepts	1
2. Steady – state cascade theory : the ideal cascade	28
3. Steady – state cascade theory: square and squared – off cascades	69
4. Distillation	100
5. Equilibrium processes employing a separating agent	211
6. Other equilibrium processes	299
7. Irreversible processes: gaseous diffusion	348
8. Irreversible processes: mass and thermal diffusion	379
9. Other irreversible processes	420
10. Multicomponent separations	411
11. The unsteady state	505
12. Appendix. Table of values of the separation potential	522
13. Subject index	529
