

CONTENTS

1	Economic Assessment of membrane Processes	1
2	Separation of Unsaturates by Complexing with Nonaqueous Solutions of Cuprous Salts	19
3	Olefin Recovery and Purification via Silver Complexation	59
4	Immobilized Bioadsorbents for Dissolved Metals	85
5	Membrane Separations in the Recovery of Biofuels and Biochemicals: An Update Review	99
6	Commercial Applications of Emulsion Liquid Membranes	195
7	Evaluation of Mass Transfer Coefficients from Single-Drop Models in Pulsed Sieve-Plate Extraction Columns	213
8	Liquid Water Concentration by Electrodialysis	229
	Index	303
