

CONTENTS

1. Introduction	1
2. Fundamentals of the reactions of carbocations with nucleophiles	51
3. Mechanistic aspects of cationic polymerization of alkenes	137
4. Controlled / living carbocationic polymerization	265
5. Controlled polymer synthesis by cationic polymerization	381
6. Cationic polymerization of heterocyclics	437
7. Step – growth electrophilic oligomerization and polymerization	555
8. Industrial cationic polymerizations: an overview	693
9. Index	751
