

CONTENTS

1. Stimulation of Innovation in the Fermentation Industries	1
2. Genetics of Industrial Microorganisms	5
3. Aeration	47
4. The Use of Economic Analysis of Penicillin G Manufacturing Costs in Establishing Priorities for Fermentation Process Improvement	75
5. Cellulase and Biosynthesis Regulation	111
6. Single Cell Protein from C ₁ Compounds	141
7. Beta-Lactam Antibiotics	197
8. Antitumor Antibiotics	215
9. Nucleoside and Nucleotides	253
10. Microbial Transformation of Steroids	275
11. Mushrooms: Single Cell Protein from Cellulose	305
Index	341
