

CONTENTS

1. Thermodynamic feasibility of a chemical reaction	1
2. Kinetics and reactor design	31
3. Reversible exothermic reactions	57
4. Steam reforming of hydrocarbons	94
5. hydrocarbons cracking and olefine manufacture	121
6. Multi – step reaction processes	153
7. Exothermic catalytic – phthalic anhydride synthesis	182
8. Homogeneous catalysis by co – ordination compounds of transition metals – wacker process for acetaldehyde synthesis	207
9. Index	239
