

CONTENTS

1. Introduction	1
2. Normal freezing and the distribution coefficient	8
3. theory of zone refining	27
4. Techniques of zone refining	71
5. Applications of zone refining	128
6. Continuous zone refining	171
7. Zone leveling, crystal growth, and related techniques	199
8. Zone melting with volatile constituents	215
9. Methods of perturbing the concentration	226
10. Temperature – gradient zone melting	254
11. Miscellaneous phenomena and uses of zone melting	269
12. Appendix	285
13. Index	307
