

**CONTENTS**

1. Introduction	3
2. The characteristics of biological material	17
3. The fermentation pathways	42
4. Kinetics – preliminary remarks on fermentation	75
5. Continuous fermentation	107
6. Aeration and agitation	133
7. Scale – up	163
8. Media sterilization	186
9. Air sterilization	217
10. Operation, measurement and control	245
11. Mechanical separation and disintegration of cells for product recovery	282
12. Author index	321
13. Subject index	324
