

**CONTENTS**

|                                             |     |
|---------------------------------------------|-----|
| 1. General considerations                   | 1   |
| 2. Flow of fluids                           | 20  |
| 3. Transportation of fluids                 | 63  |
| 4. Flow of heat                             | 118 |
| 5. Evaporation                              | 172 |
| 6. General mechanism of diffusion processes | 239 |
| 7. Humidity and air conditioning            | 248 |
| 8. Drying                                   | 280 |
| 9. Distillation                             | 323 |
| 10. Gas absorption                          | 376 |
| 11. Extraction                              | 412 |
| 12. Crystallization                         | 438 |
| 13. Filtration                              | 467 |
| 14. Mixing                                  | 511 |
| 15. Crushing and grinding                   | 522 |
| 16. Size separation                         | 558 |
| 17. Index                                   | 647 |
