

CONTENTS

SECTION 1

Chapter 1. Chemical economics	3
2. Fuels	15
3. Refrigeration	96
4. Engineering in the Chemical works	189
5. Materials of construction	210

SECTION 2

Chapter 6. Material and heat balances	249
7. The flow and measurement of fluids	279
8. Transport of materials	299
9. Heat transmission	337
10. Evaporation	368
11. Gas absorption	392
12. Distillation	434
13. Solvent Extraction	470
14. Leaching	497
15. Air conditioning water cooling and drying	511
16. Size reduction and size separation	549
17. Filtration	577
18. Instrumentation	587

SECTION 3

Chapter 19. Process evaluation	643
20. Design of causticizing plant	650
21. Design of acetone recovery plant	707
22. Design of plant for 1,500 tons/a ethyl acetate	743

SECTION 4

23. Chemical and physical tables	881
24. General index	987
