

**CONTENTS**

1. Introduction	1
2. Aspects of Living Processes	13
3. Control of Micro-Organisms	30
4. Proteins and Enzymes	62
5. Colloids and Electrophoresis	84
6. Emulsions	108
7. Reaction Kinetics	145
8. Energy in Biological Systems	176
9. Redox Potentials and Polarography	196
10 Aspects of Mass Transfer	214
11. Heat Transfer	249
12. Air Compression and Cleaning	293
13. Disinfection by Chemical Methods	327
14. Reduced Temperature Preservation	358
15. Dehydration	398
16. Drying Under Reduced Pressure	427
17. Electromagnetic Radiations	458
18. Isolation of Products	502
19. Equipment Design	572
20. Commercial Enzymes	597
21. Yeasts	613
22. Antibiotics	641
23. Other Fermentation Products	662
24. Vaccine Manufacture	680
25. Effluent Disposal	704
26. Index	733
