

## CONTENTS

<b>Chapter 1</b>	<b>General Considerations</b>	<b>1</b>
1.	Definition	1
2.	Why	2
3.	Preliminary Economic Study	5
4.	Kind and Size	6
5.	Manpower	12
6.	Liaison	20
7.	Location of the Pilot Plant	22
8.	Planning the Attack	23
9.	The Use of Pilot Plant Data	27
10.	The Operation of the Pilot Plant as a Production Unit	28
<b>Chapter 2</b>	<b>The Scale-Up Problem</b>	<b>31</b>
1.	Definition	31
2.	Similitude	32
3.	Agitation	36
4.	Scale-Up of Mixing Data	39
5.	Departure Similitude	47
6.	Chemical Similitude	47
7.	The Search for the Controlling Rate Process	49
8.	Scale-Up of Engineering Equipment	52
<b>Chapter 3</b>	<b>The Handling of Solids, Liquids, and Gases</b>	<b>55</b>
1.	Materials Handling on the Pilot Scale	55
2.	Gases	55
3.	Metering and Controlling the Flow of Gases	59
4.	The Storage of Gases	64
5.	Liquids	64
6.	General Purpose Pumping Equipment	68
7.	The Storage of Liquids	71
8.	Solids	72
9.	The Transport of Solids	73
<b>Chapter 4</b>	<b>Chemical Reactors</b>	<b>77</b>
1.	Types of Reactors	77
2.	Pilot Scale Reactors	82

<b>Chapter 5 Separation Process</b>	<b>99</b>
1. Definition	99
2. Transport Separation	100
3. Mechanical Separations	117
<b>Chapter 6 Cost Estimation and Report Writing</b>	<b>133</b>
1. Cost Estimation	133
2. Making a Cost Estimate	135
3. Operating Costs	137
4. Working Capital, Payout Time, and Return on Investment	140
5. Report Writing	141
6. The Time for Report Writing	142
7. The Physical Form of the Report	143
Literature References	149
Index	151
