

**CONTENTS**

1. Introduction	1
2. Human relations in chemical engineering	11
3. Useful mathematical tools	27
4. Important concepts of physics and chemistry	54
5. The material balance	104
6. The energy balance	144
7. Static equilibria	199
8. Dynamic equilibria	245
9. The economic balance	302
10. Presentation of technical results	344
11. Appendix	363
12. Index	413
