

CONTENTS

<b>Chapter 1 BASIC THEORY</b>	<b>1</b>
I. Introduction	1
II. Theoretical Considerations	4
III. Basic Geometry	10
IV. Low-Internal-Phase-Ratio Emulsions	34
V. Medium-Internal-Phase-Ratio Emulsions	42
VI. High-Internal-Phase-Ratio Emulsions	49
VII. Summary	66
References	68
<b>Chapter 2 MAKING AND BREAKING EMULSIONS</b>	<b>71</b>
I. Introduction	72
II. Reasons for Using Emulsions	72
III. Selection of Emulsion Type	74
IV. Selection of Emulsifier	75
V. Techniques of Emulsification	103
VI. Techniques of Breaking Emulsions	11
References	123
<b>Chapter 3 MICROEMULSIONS</b>	<b>125</b>
I. Introduction	126
II. Identification	127
III. Theory	145
IV. Practical Applications	161
References	175
<b>Chapter 4 AGRICULTURAL EMULSIONS</b>	<b>179</b>
I. Introduction	181
II. Calculations of Formulations	183
III. Solvents for Agricultural Formulations	185
IV. Surfactants for Agricultural Formulations	187
V. Emulsion Stability	190
VI. Blending Emulsifiers and Economics	200
VII. Water and Agricultural Formulations	201
VIII. Testing	208
IX. Suggested Optimization of Emulsifiable Concentrates	210

X.	Selection of Emulsion Type	214
XI.	Some Special Formulations	219
XII.	Soil Penetration, Adsorption, and Mobility	226
XIII.	Application Techniques	227
	References	256
<b>Chapter 5 FOOD EMULSIONS</b>		<b>249</b>
I.	Introduction	250
II.	Emulsion Properties	253
III.	Emulsification	258
IV.	Product Development	268
V.	Equipment	274
VI.	Food Emulsions	279
VII.	Other Uses for Surfactants	281
VIII.	Multiple Emulsifier Effects	286
	References	289
<b>Chapter 6 MEDICINAL EMULSIONS</b>		<b>291</b>
I.	Introduction	292
II.	Demulsifying Agents and Other Emulsion Adjuvants Used in Medicine	295
III.	Some Technical Considerations in the Design and Preparation of Medicinal Emulsions	306
IV.	Product Review	322
	References	343
<b>Chapter 7 EMULSION PAINTS</b>		<b>351</b>
I.	Introduction	352
II.	Latex-Paint Vehicles	360
III.	Paint Formulation	367
IV.	Trade-Sales Coatings	374
V.	Latex Maintenance Paints	379
VI.	Industrial Latex Paints	380
	References	384
<b>Chapter 8 ASPHALT EMULSIONS</b>		<b>387</b>
I.	Introduction	389
II.	Advantages of Asphalt Emulsions	390
III.	Product Types and Nomenclature	391
IV.	Emulsifiers for Asphalt	392
V.	Improvement of Asphalt Emulsifiability	399

VI.	Additives in Emulsions	399
VII.	Manufacture of Emulsions	403
VIII.	Emulsion Properties and Testing	407
IX.	The Technology of Paving with Emulsions	412
X.	Industrial Emulsions	419
XI.	Agricultural and Water-Conservation Uses	425
	References	430
