

CONTENTS

On the Phase Inversion in H <sub>2</sub> O-Oil-Nonionic Surfactant Systems and Related Phenomena	1
The Microemulsion Concept in Non-polar Surfactant Solutions	17
Dynamic Light Scattering from Water Microemulsions in Organic Media	33
Formation and Structure of Four-Component Systems Containing Polymeric Surfactants	49
Viscosity and Conductivity of Microemulsions	65
Structural and Solubilization Properties of Nonionic Surfactants. A Comparative Study of Two Homologous Series	85
Dielectric Studies of a Nonionic Surfactant-Alkane-Water System at Low Water Content	103
On the Structure and Dynamics of Microemulsions. Self-Diffusion Studies	115
Phase Diagram and Interfacial Tension of Brine-Dodecane-Pentanol-Sodium Octylbenzenesulfonate Systems	131
Alcohol Effects on Transitions in Liquid Crystalline Dispersions	143
Connection Between Chemical Rate Coefficients and Two-Particle Correlation Functions in Aggregated Systems	173
Fast Dynamic Processes in the Hydrocarbon Tail Region of Phospholipid Bilayers	185
Properties of High Emulsifier Content O/W Microemulsions	207
Dynamic Processes in Water-in-Oil Microemulsions	221
Ultrasonic Relaxation Studies of Microemulsions	233
Index	257
