

CONTENTS

Introduction	1
1.1 Definition of Emulsions	3
1.2 Definition of Solubilization	4
1.3 Definition of Microemulsion	5
1.4 Definition of HLB, HLB number and HLB Temperature (Phase Inversion Temperature = PIT in emulsion)	6
References	7
1 Correlation Between Solution Behavior of Surfactants and Solubilization	
Microemulsions or Emulsion Types in Surfactant / Water / Oil Systems	11
1.1 The Effect of Temperature and/or the Hydrophilic Chain Length of Emulsifier on the Solution Behavior of Nonionic Surfactant, Solubilization, and Types of Dispersions in Surfactant/Water Oil Systems	12
1.1.1 The Change of the Dissolution State of Nonionic Surfactant with Temperature	12
1.1.2 The Effect of Temperature on the Solubilization of Oil in Aqueous Solutions of Nonionic Surfactants	19
1.1.3 The Effect of Temperature on the Solubilization of Water in Nonaqueous Solutions of Nonionic Surfactants	22
1.1.4 The Change of Emulsion Type with Temperature	24
1.2 The Effect to Temperature and/or the Hydrophilic Chain Length of Surfactant on the Phase Equilibria and the Types of Dispersions of the Ternary System Composed of Water, Cyclohexane, and Nonionic Surfactant	28
1.2.1 The Effect of Temperature on the Phase Equilibria	28
1.2.2 Characteristic Temperature for the Mutual Dissolution of Oil and Water: Hydrophile Lipophile Balanced Temperature (HLB Temperature)	32
1.2.3 The Effect of Oxyethylene Chain Length of Nonionic Surfactant on the Phase Equilibria	34
1.2.4 The Effect of Temperature on the Dispersion Types	36
1.3 Solution Behavior of Ionic Surfactant + Cosurfactant/Water / Oil Systems	40
1.3.1 The Change of the Dissolution State of Ionic Surfactant + Cosurfactant with the Compositions	41
1.3.2 The Effect of the Types of Counterions, the Types of Surfactants, and Hydrocarbon Chain Length of Surfactants	43
1.3.3 The Effect of Temperature on the HLB of Ionic Surfactant and Cosurfactant Mixture	48
References	50

2	Concepts of HLB, HLB Temperature, and HLB Number	55
2.1	Concepts of Hydrophile-Lipophile Balance (HLB) of Surfactant	56
2.2	HLB Temperature (Hydrophlie-Lipophile Balance Temperature or PIT)	58
2.3	HLB Number	68
2.3.1	H/L Number	71
2.3.2	Correlation Between the HLB Number and Other Properties	83
2.3.4	Application of the HLB Method	84
2.4	Hydrophile-Lipophile Balance, HLB, of Ionic Surfactants	88
