

CONTENTS

SESSION 1

- 1 Emulsification of styrene with mixtures of anionic emulsifier and long-chain fatty alcohol.
Emulsion polymerization with initiation in monomer droplets. 13
- 2 The adsorption behaviour of polyelectrolytes at liquid-liquid interfaces and the properties
of polyelectrolyte-stabilized emulsions 23
- 3 The effect of equilibrium and dynamic interfacial properties on the elementary
emulsification process 41
General discussion (papers 1-3) 55

SESSION 2

- 4 The centrifuge techniques in the study of emulsion stability 61
- 5 The conformation of proteins at interfaces and their role in stabilizing emulsions 75
- 6 Fluid mechanics of oil slicks and emulsion formation 99
General discussion (papers 4-6) 117
- 7 Comparison of rheological studies on adsorbed emulsifier films with X-ray studies of the
bulk solutions 123
- 8 The effect of crude oil-water interfacial properties on water-crude oil emulsion stability 135
General discussion (papers 7-8) 153

SESSION 3

- 9 The preparation and properties of bitumen emulsions stabilized cationic surface-active
agents 157
- 10 A general description of the breaking process of cationic bitumen emulsions in contact with
mineral aggregate 179
- 11 Use of cationic bitumen emulsions in skid-resistant surface dressings on main roads and
motorways 201
- 12 Water-in-oil emulsions stabilized by block copolymers—apparatus and preliminary results 217
- 13 The use of emulsion in the application of pesticides 227
- 14 Wax emulsions: formation and manufacture 239
General discussion (papers 12-14) 253

SESSION 4

15	Liquid crystals and spontaneous emulsification	257
16	Emulsions stabilized non-ionic surface-active agents: effect of electrolyte	271
17	Stability of oil-in-water emulsions in polymer-surfactant complexes. Paraffin-water emulsions in mixtures of poly (vinyl alcohol) with cetyltrimethy ammonium bromide or sodium dodecylbenzene sulphonate	281
18	The stability of oil-in-water emulsions containing paraffinic oils and alkyl sulphates	305
19	The influence of the disperse phase on the stability of oil-in-water emulsions	325
	general discussion (papers 18-19)	347
	Index	351
