

CONTENTS

PART I GENERAL

European Aerosol Studies	3
Research and Development in Japan on Fine Particle Measurement and New Control Devices	23
Standardization and Calibration of Aerosol Instruments	39

PART II AEROSOL GENERATION

The Generation of Aerosols of Fine Particles	57
Generation of Monodisperse Submicron Aerosols by Ablation from Transpiration-Cooled Porous Matrices	111
Generation of Monodisperse Aerosols of ⁶⁷ Ga-Labeled Aluminosilicate and ¹⁹⁸ Au-Labeled Gold Spheres	129
Aerosol Generation for Industrial Research and Product Testing	145
Aerosol Generation Using Fluidized Beds	173
Large Flow Rate Redispersion Aerosol Generator	195
Generation of Inorganic Aerosols for Weather Modification Experimentation	219
Generation of Aerosols by Bursting of Single Bubbles	235
An Investigation of an Exploding Wire Aerosol	253
Aerosol Particle Formation From Photo-oxidation of Sulfur Dioxide Vapor in Air	275

PART III AEROSOL SAMPLING

Size-Selective Sampling for Inhalation Hazard Evaluations	287
Dichotomous Virtual Impactors for Large Scale Monitoring of Airborne Particulate Matter	311
Design Performance and Applications of Spiral Duct Aerosol Centrifuges	351
Problems in Stack Sampling and Measurement	399
Inertial Impactors: Theory, Design and Use	411
The Cylindrical Aerosol Centrifuge	447

PART IV AEROSOL MEASUREMENT AND ANALYSIS

Methods for Determination of Aerosol Properties	467
Aerosol Mass Measurement Using Piezoelectric Crystal Sensors	485
Measurements of Aerosol Optical Parameters	511
A Review of Atmospheric Particulate Mass Measurement Via the Beta Attenuation Technique	535
Detection of Ultra-fine Particles by Means of a Continuous Flux Condensation Nuclei Counter	565
Electrical Measurement of Aerosol	581
Recent Developments Regarding the Use of a Flame Ionization Detector as an Aerosol Monitor	625
Contact Electrification Applied to Particulate Matter-Monitoring	649

Open Cavity Laser “Active” Scattering Particle Spectrometry From 0.05 to 5 Microns	669
Single Particle Optical Counter: Principle and Application	697
Comparison of Impaction, Centrifugal Separation and Electron Microscopy for Sizing Cigarette Smoke	731
Extended Electric Mobility Method for Measuring Aerosol Particle Size and Concentration	739
Rapid Measurement of Particulate Size Distribution in the Atmosphere	763
Identification and Measurement of Particulate Transport Properties	777
Optical Aerosol Size Spectrometry below above the Wavelength of Light – A Comparison	793
AUTHOR INDEX	817
SUBJECT INDEX	833
