

CONTENTS

I HOMOGENEOUS SYSTEMS AND THEIR PROPERTIES

1. Introduction	1
2. Historical Background	8
3. The Structure of Liquids and Gases	13
4. Propellants	18
5. Containers	34
6. Valves and Actuators	46
7. Loading Methods	54
8. Spray Characteristics	63
9. Vapor Pressure	73
10. Solubility	91
11. Viscosity	104
12. Density	111
13. Stability	118
14. Flammability of Aerosols and Aerosol Propellants	135

II EMULSIONS, FOAMS AND SUSPENSIONS

15. Surfaces and Interfaces	161
16. General Properties of Emulsions	186
17. General Properties of Foams	210
18. Aqueous Aerosol Emulsions and Foams	222
19. Molecular Complexes in Aerosol Emulsions and Foals	248
20. Aqueous Alcohol Foams	277
21. Nonaqueous Foams	286
22. Aerosol Powders	311

III MISCELLANEOUS

23. Food Aerosols	323
24. Miscellaneous Aerosol Systems	342
25. Sampling and Analysis of Aerosol Products	360
26. Toxicity	372
27. Triangular Coordinate Charts	391

Index	411
