

CONTENTS

Effect of Droplet Flocculation on Emulsion Viscosity	1
Hydrodynamic Aspects of the Formation of Emulsions	15
Free Energy Calculations of Diffuse Double Layer Systems. The “Secondary Minimum”	27
The Behaviour of Deformable Drops in Laminar Shear Flow	41
Effect of Particle Aggregation on the Rheological Behaviour of Disperse Systems	43
Stabilization of Emulsions with Gum Acacia	59
The Influence of Emulsifier Concentration on the Rheological Properties of Emulsions	73
Dielectric Behaviour of Emulsions	91
The Effect of Concentration on the Viscosity of Suspensions and Emulsions	115
The Physical Structure of Ice Cream	125
GENERAL DISCUSSION	133
INDEX	141
