

CONTENTS

BACKGROUND AND THEORY

1. Viscoelastic Surfactant Solutions	2
2. Theoretical modeling of Viscoelastic Phase	32
3. Dynamical Properties of Wormlike Micelles: Deviations from the “Classical” Picture	51
4. Interesting Correlations Between the Rheological Properties of Rod-Shaped Micelles and Dye Assemblies	63

RHEOLOGY AND STRUCTURE

5. Microstructure of Complex Fluids by Electron Microscopy	86
6. Cryo-Transmission Electron Microscopy Investigations of Unusual Amphiphilic Systems in Relation to Their Rheological Properties	105
7. Structure of Sheared Cetyltrimethylammonium Tosylate – Sodium Dodecylbenzenesulfonate Rodlike Micellar Solutions	120
8. Rheo-optical Behavior of Wormlike Micellar Systems	129
9. Spinnability of Viscoelastic Surfactant Solutions and Molecular Assembly Formation	140
10. Correlation of Viscoelastic Properties with Critical Packing Parameter for Mixed Surfactant Solutions in the L_1 Region	153
11. Effect of Alcohol Chain Length on Viscosity of Sodium Dodecyl Sulfate Micellar Solutions	167
12. Control of Flow Properties in Surfactant Solutions via Photoreactions of Solubilizates	181
13. Microstructure and Rheology of Nonionic Trisiloxane Surfactant Solutions	192
14. Rheology of Sucrose Ester Aqueous Systems	217
15. Rheological Study of Polycrystalline Lyotropic Mesophases in the Cesium n-Tetradecanoate – Water System	229
16. Optical probe Studies of Surfactant Solutions	239
17. Flexibility of Cetyltrimethylammonium 3,5-Dichlorobenzoate Micelles	250

SHEAR EFFECTS

18. Shear Effects in Surfactant Solutions	260
19. Formation of Nonequilibrium Micelles in Shear and Elongational Flow	278
20. Structure of Complex Fluids under Flow and Confinement: X-ray Couette Shear Cell and the X-ray Surface Forces Apparatus	288
21. Relation Between Rheology and Microstructure of Lyotropic Lamellar Phases	300
22. Steady Shear Behavior of Ternary Bicontinuous Cubic Phases	306

POLYMER-MICELLE INTERACTIONS

- | | |
|--|-----|
| 23. Polymer – surfactant Complexes | 320 |
| 24. Interactions Between Water-soluble Nonionic Polymers and Surfactant Aggregates | 337 |

APPLICATIONS

- | | |
|---|-----|
| 25. Viscoelastic Surfactants: Rheology Control Without Polymers or Particulates | 352 |
| 26. Effect of Counterion Structure on Flow Birefringence and Drag Reduction Behavior of Quaternary Ammonium Salt Cationic Surfactants | 370 |
| 27. Interfacial Rheology of B-Casein Solutions | 380 |
