

CONTENTS

I. Equipment	
1. Scope and Goals	3
2. Catalysts Prepared by Precipitation	15
3. Solution and Slurry Transfer	23
4. Filtration	29
5. Drying: Containers, Trays, and Other Drying Auxiliaries	43
6. Calcining	61
7. Rewashing and Ion Exchange	71
8. Densification of Calcined and Ion-Exchanged Catalytic Material	75
9. Pulverization, Pilling, and Extrusion	85
10. Spray Drying	99
11. Crushing and Screening to Produce Granules	101
12. Coating (Not Impregnation)	109
13. Impregnation to Orient the Coating Materials to the Support	115
II. Operating Procedures	
14. Petroleum Processing Catalysts	121
15. Catalysts for Synthesis Gas Processing	145
16. Ammonia Synthesis Catalysts	167
17. Methanol Synthesis Catalysts	171
18. Hydrogenation Catalysts	177
19. Dehydrogenation Catalysts	189
20. Oxidation Catalysts	197
21. Ammoxidation: Synthesis of Acrylonitrile from Ammonia and Propylene	213
22. Oxychlorinations or Oxyhydrochlorinations	217
23. Vinyl Acetate Synthesis from Ethylene and Acetic Anhydride	221
24. Supported Precious Metals Catalysts	225
25. Palladium on Powdered Carbon	227
26. Enantioselective Catalysts	235
27. Polymerization Catalysts	243
28. Dehydration Catalysts	247
29. The Claus Process Catalysts	251
30. Preparation of Automotive Exhaust Catalysts	253
31. SO _x and NO _x Abatement Catalysts	263
Appendix: Catalyst Metals Values Reclaimers	271
