

## 660.2 COU V.3

### CONTENTS

1. Reactor design – general principles	1
2. The design of catalytic reactors	87
3. Process control	165
4. Computers and methods for computation	255
5. Biochemical reaction engineering	347
6. Non- newtonian technology	405
7. Sorption processes	475
8. Index	607
