

CONTENTS

Part 1

1. Chemical process development problems, economics, and scale –up	1
2. The distribution of residence times in continuous flow systems	95
3. Unit operations in stirred vessels	111
4. Chemical reaction kinetics, reactor development, and scale – up	175
5. Vapor – liquid equilibria	313

Part 2

6. Pilot – plant distillations	405
7. Gas absorption in packed and plate columns	489
8. Solvent extraction	551
9. Crystallization	707
10. Filtration	789
11. Centrifugation	837
12. Drying	855
13. The measurement of physical properties	941
Author index parts 1 and 2	961
Subject index parts 1 and 2	979
