

CONTENTS

I. MATERIALS AND ENERGY BALANCES NOT INVOLVING CHEMICAL REACTIONS		
Chapter 1	A Modern Petroleum Refinery	3
Chapter 2	Material Balances: Balances without Chemical Reactions	24
Chapter 3	Heat, Enthalpy, and Heat Capacity	48
Chapter 4	Energy Balances Involving Enthalpy and Heat	70
II. MATERIAL AND ENERGY BALANCES WITH CHEMICAL REACTIONS		
Chapter 5	Phthalic Anhydride Production	81
Chapter 6	Heats of Reaction	98
Chapter 7	Material Balances Involving Chemical Reactions and Tie Substances	112
Chapter 8	Energy Balances Involving Chemical Reactions: Isothermal Reactors	125
Chapter 9	Energy Balances Involving Chemical Reactions: Adiabatic Reactors	145
III. MATERIAL AND ENERGY BALANCES INVOLVING RECYCLE OPERATIONS		
Chapter 10	Ethylene Oxide Production	159
Chapter 11	Material Balances Recycle	167
IV. MATERIAL AND ENERGY BALANCES INVOLVING SEPRATION OPERATIONS		
Chapter 12	Fermentation Processes	185
Chapter 13	Vapor-Liquid Equilibria and Distillation Processes	198
Chapter 14	Recovery of Potassium Chloride from Brines and Mixed Salts	227
Chapter 15	Liquid-Solid Equilibria and Crystallization Processes	235
Chapter 16	Manufacture of Pulp and Paper	251
Chapter 17	Humidification, Drying and Evaporation Processes	265
V. MATERIAL AND ENERGY BALANCES INVOLVING CHEMICAL EQUILIBRIUM REACTIONS		
Chapter 18	Ammonia Synthetic and Other High-Pressure Processes	291
Chapter 19	Material and Energy Balances Involving Equilibrium Reactions	305
VI. MATERIAL AND ENERGY BALANCES INVOLVING WORK		
Chapter 20	Atomic Energy and Nuclear Power Generation	325
Chapter 21	Work and Energy Balances Involving Work	346
	Appendixes	364
	Index	393
