

CONTENTS

1. The Needs for Sensors in Bacterial and Yeast Fermentations	1
2. Sampling	17
3. On-Line Monitoring of Bioprocesses Using HPLC	39
4. High-Performance Liquid Chromatography	47
5. Applications of NADH-Dependent Fluorescence Sensors for Monitoring and Controlling Bioprocesses	75
6. Fiber-Optic Sensors in Bioprocess Control	95
7. Applications of Electrochemical Sensors	127
8. Electrochemical Biosensors for Bioprocess Control	173
9. Thermistor Probes	193
10. Flow Injection Analysis in Bioprocess Control	221
11. The Use of On-Line Sensors in Bioprocess Control	243
12. Multicomponent Analysis and Chemometrics for Bioprocess Control	293
Index	319
