

CONTENTS

Translators 'preface	21
1. The fundamental Principles and Problems of Industrial Chemistry	23
2. Equilibrium Constants and Reaction Yields	40
3. Theoretical and Practical Principles in the Management of Industrial Chemical Processes	60
4. Industrial Chemistry and Industrial Chemistry Plant Technology	89
5. The Problematics of Water	103
6. Sulphur and Its Principal Compounds	177
7. The Industrial Utilization of Air	234
8. The Industrial Compounds of Nitrogen	257
9. The Halogens within the Framework of Industrial Inorganic Chemistry	312
10. The Phosphorus and boron Industries	348
11. The Chemical Fertilizer Industry	382
12. Sodium, Potassium, and Related Compounds	416
13. Chemical Aspects of Industrial Metallurgy	438
14. Silicate Products and their Substitutes	551
15. Bitumens, Tars and Derivatives	647
16. Index	702
