

CONTENTS

PART ONE : RAW MATERIALS AND THEIR USES

I.	Introduction	19
II.	On Coal, Petroleum and Metals	23
III.	More about Metals	41
IV.	Raw Materials of the Builder and the Potter	57
V.	Range of Products of the Chemical Industries	69
VI.	Some Special Fields of Application of Chemical Products	86
VII.	Raw Materials of the Textile Industries and of the Leather Trade	99
VIII.	A few other fundamental Raw Materials of Vegetable and Animal Origin	112
IX.	The Raw Materials with the most varied Uses	129

PART TWO : OCCURRENCE OF RAW MATERIALS

I.	Nature of Raw Materials	145
II.	Mineral Deposits and Methods of Extraction	150
III.	Coalfields and Oilfields	162
IV.	The Production of Coal and Petroleum	172

PART THREE : PREPARATION OF RAW MATERIALS

I.	Scope of Preparation of Raw Materials	193
II.	Preparatory Operations applicable to Minerals in general	198
III.	Processes associated with the Preparation of Ores prior to Metallurgical Treatment	216
IV.	Metallurgical Treatments as applied in the final Preparation of Metals	234
V.	Metallurgical Treatments as applied in the final Preparation of Metals	245
VI.	From Crude Petroleum to Refined Oil Products	261
VII.	Treatment of Coal for the Preparation of Coal Derivatives and Oil	276
VIII.	About Fibres and their Preparation	288
IX.	Special Preparatory Treatment required by the individual types of Fibre	301
X.	Special Preparatory Treatment required by the individual types of Fibre	319
XI.	Preparing the Raw Materials of the Leather Trade	334
XII.	A few other basic Raw Materials and their Preparation	343
	Bibliography	357
	Indexes	367
