

## CONTENTS

|  |     |
|--|-----|
| Introduction   | v   |
| The role and development of diaphragm cells in the chlorine industry   | 1   |
| Metal anodes   | 11  |
| The current technology and future development of dimensionally stable anodes                                   | 15  |
| Concentration and desalting systems for diaphragm cell liquor  | 23  |
| Fundamentals of diaphragm performance  | 33  |
| Technical advances in diaphragm chlorine cells   | 41  |
| The Nobel diaphragm cell: a flexible design for high currents and its performance characteristics<br>at 330 kA | 53  |
| The Glanor <sup>R</sup> electrolyzer-the new look in chlorine production                                       | 67  |
| Recent advances in Hooker chlor-alkali cell technology   | 79  |
| Membrane cells-where are we now?   | 93  |
| Membrane chlorine cell design and operation  | 103 |
