

**CONTENTS**

Application of Energy-Efficient Plant Design	1-5
Economic Aspects: Processing Very Weak SO <sub>2</sub> Gases to Sulfuric Acid	6-18
Graphite vs. Plate Exchangers in Quench Acid Service	19-23
Advances in Sulfuric Acid Design	24-26
The Wellman-Lord SO <sub>2</sub> Recovery Process	27-32
Nature's Laws for Sulfuric Acid Plants	33-40
New Phosphoric Reactor Air-Cooling System	41-46
The Prayon Process For Wet Acid Purification	47-51
Pond Water Use in Wet Grinding of Phosphate Rock	52-61
Improved SIAPE Process With Mono-Reactor	62-64
Rhone-Poulenc Phosphoric Acid Evaporator	65-67
Upgrading a Phosphoric Acid Facility	68-70
Control of Groundwater Pollution from Phosphoric Acid Waste Gypsum Stacks	71-80
LETS Process for Triple Super-Phosphate	81-84
Scrubbers for Phosphoric Acid Plants	85-90
Two-Stage Lime Treatment in Practice	91-96
Update on Ammonia Scrubbing	97-100
Sulfuric Acid Energy Design for the 80s	101-107
Cogeneration in Large Complexes	108-114
Cogeneration's Place in a Modern Facility	115-119
Energy Savings in a New Phosphoric Acid Plant	120-133
Energy Conservation by Hemihydrate Process	134-146
Advantages of the Wet Gas Sulfuric Acid Process	147-150
Developments in the Concentration of Sulfuric Acid	151-155
Sulfuric and Phosphoric Acid Plant Lining Systems	156-160
New Mist Eliminator for Improved Sulfuric Acid Plant Operation	161-170
Uranium Recovery in a Concentrated P <sub>2</sub> O <sub>5</sub> Hemihydrate Plant	171-174
Liquid Membrane Extraction of Uranium from Wet Process Phosphoric Acid	175-183
Long-Term Potential of Uranium Recovery from H <sub>3</sub> PO <sub>4</sub>	184-194
OPPA Uranium Extraction Process	195-199
Extraction of Uranium from Phosphoric Acid	200-206
Concrete Skin Gives New Life to Phosphoric Acid Reactor	207-211
Sulfuric Acid Plants: R & D Report	212-215
