

CONTENTS

MACROMOLECULAR STRUCTURE AND PROPERTIES

1. The Lignin Paradigm	2
2. Structure and Properties of the Lignin-Carbohydrate Complex Polymer as an Amphipathic Substance	11
3. Heterogeneity of Lignin: Dissolution and Properties of Low-Molar-Mass Components	29
4. Supercritical Fluid Extraction of Lignin from Wood	42
5. Determination of a Polymer's Molecular Weight Distribution by Analytical Ultracentrifugation	58
6. Molecular Weight Distribution of Aspen Lignins Estimated by Universal Calibration	82
7. Molecular Weight Determination of Hydroxypropylated Lignins	100
8. Molecular Weight Distribution Studies Using Lignin Model Compounds	109
9. Determination of the Molar Mass Distribution of Lignins by Gel Permeation Chromatography	124
10. Determinations of Average Molecular Weights and Molecular Weight Distributions of Lignin	134
11. Association of Kraft Lignin in Aqueous Solution	144
12. Modes of Association Between Kraft Lignin Components	155
13. Reversed-Phase Chromatography of Lignin Derivatives	177

GENERAL MATERIALS

14. Specialty Polymers from Lignin	190
15. High-Performance Polymers from Lignin Degradation Products	205
16. Modification of Lignin to Electrically Conducting Polymers	219
17. Production and Hydrolytic Depolymerization of Ethylene Glycol Lignin	228
18. New Trends in Modification of Lignins	245
19. Application of Computational Methods to the Chemistry of Lignin	262
20. Differential Scanning Calorimetry and NMR Studies on the Water-Sodium Lignosulfonate System	274
21. Preparation and Testing of Cationic Flocculants from Kraft Lignin	284
22. Synthesis and Characterization of Water-Soluble Nonionic and Anionic Lignin Graft Copolymers	294

PHENOLIC COMPOUNDS

23. Characteristics and Potential Applications of Lignin Produced by an Organosolv Pulping Process	312
24. Organosolv Lignin-Modified Phenolic Resins	324
25. Wood Adhesives from Phenolysis Lignin: A Way To Use Lignin from Steam-Explosion Process	334
26. Modification of Lignin at the 2-and 6-Positions of the Phenylpropanoid Nuclei	346
27. Enzymatic Modification of Lignin for Technical Use: Strategies and Results	361

POLYOLS, POLYURETHANES, POLYBLENDS, AND GRAFTS

28. Estimating the Adhesive Quality of Lignins for Internal Bond Strength	372
29. Heat-Resistant Polyurethanes from Solvolysis Lignin	382
30. Elastomeric Polyurethanes from a Kraft Lignin-Polyethylene Glycol-Toluene Diisocyanate System	390
31. Effect of Soft-Segment Content on the Properties of Lignin-Based Polyurethanes	402
32. Starlike Macromers from Lignin	414
33. Hydroxypropyl Lignins and Model Compounds: Synthesis and Characterization by Electron-Impact Mass Spectrometry	425
34. Bleaching of Hydroxypropyl Lignin with Hydrogen Peroxide	436
35. Polymer Blends with Hydroxypropyl Lignin	452
36. Phase Morphology of Hydroxypropylcellulose Blends with Lignin	464
37. Engineering Lignopolystyrene Materials of Controlled Structures	476

EPOXIES AND ACRYLICS

38. Recent Progress in Wood Dissolution and Adhesives from Kraft Lignin	488
39. Ozonized Lignin-Epoxy Resins: Synthesis and Use	496
40. Lignin Epoxide: Synthesis and Characterization	506
41. Derivatives of Lignin and Ligninlike Models with Acrylate Functionality	515

APPENDIX AND INDEXES

Appendix	524
