Preface	xi
----------------------	-----------

Approaches for the Dissolution of Cellulose

1. Cellulose Solvents – Remarkable History, Bright Future	3
Tim Liebert	
2. Design of Polar Ionic Liquids To Solubilize Cellulose without Heating	55
Yukinobu Fukaya, Kensaku Hayashi, Seung Seob Kim and Hiroyuki Ohno	
3. Advances in Aqueous Cellulose Solvents	67
Ang Lue and Lina Zhang	
4. Molten Inorganic Salts as Reaction Medium for Cellulose	91
S. Fischer and K. Thümmel	
5. Dimethyl Sulfoxide and Ammonium Fluorides — Novel Cellulose Solvents	103
Thomas Heinze and Sarah Köhler	

Interaction of Solvents with Cellulose

6. Hydrogen Bond Acceptor Properties of Ionic Liquids and Their Effect on Cellulose Solubility	121
M. Sellin, B. Ondruschka and A. Stark	
7. On the Specific Behaviour of Native Cellulose Fibers upon Dissolution	137
N. Le Moigne and P. Navard	
8. Side Reactions in the System Cellulose/1-Alkyl-3-methyl-imidazolium Ionic Liquid	149
Michael Schrems, Gerald Ebner, Falk Liebner, Ernst Becker, Antje Potthast and Thomas Rosenau	
9. Cellulose Solubility: Dissolution and Analysis of "Problematic" Cellulose Pulps in the Solvent System DMAc/LiCl	165
Ute Henniges, Sonja Schiehser, Thomas Rosenau and Antje Potthast	

10. Comparison of Solution-State Properties of Cellulose Dissolved in NaOH/Water and in Ionic Liquid (EMIMAc)	179
T. Budtova, M. Egal, R. Gavillon, M. Gericke, T. Heinze, T. Liebert, C. Roy, K. Schluffer and P. Navard	
11. Aspects of the Interaction of Native and Synthetic Polymers with Direct Dissolving Liquids	197
B. Kosan, K. Schwikal, S. Hesse-Ertelt, A. Nechwatal, F. Hermanutz and F. Meister	
12. Effect of Enzymatic Treatment on Solubility of Cellulose in 7.6%NaOH-Water and Ionic Liquid	213
Peter Rosenberg, Tatiana Budtova, Monika Rom and Pedro Fardim	

Modifications of Cellulose using Solvents

13. Non-Halide Ionic Liquids for Solvation, Extraction, and Processing of Cellulosic Materials	229
Michael Hummel, Gerhard Laus, Alexander Schwärzler, Gino Bentivoglio, Egon Rubatscher, Holger Kopacka, Klaus Wurst, Volker Kahlenberg, Thomas Gelbrich, Ulrich J. Griesser, Thomas Röder, Hedda K. Weber, Herwig Schottenberger and Herbert Sixta	
14. Properties of Cellulose/TiO₂ Fibers Processed from Ionic Liquids	261
Mirela L. Maxim, Ning Sun, Richard P. Swatloski, Mustafizur Rahman, Adam G. Harland, Anwarul Haque, Scott K. Spear, Daniel T. Daly and Robin D. Rogers	
15. Novel Cellulose Products Prepared by Homogeneous Functionalization of Cellulose in Ionic Liquids	275
Susann Dorn, Michael Schöbitz, Kerstin Schluffer and Thomas Heinze	
16. Dissolution of Cellulose in Ionic Liquids and Its Application for Cellulose Processing and Modification	287
Liu ChuanFu, Sun RunCang, Zhang AiPing and Li WeiYing	
17. Imidazolium Based Ionic Liquids as Solvents for Cellulose Chemistry	299
Jürgen Vitz, Tina Erdmenger and Ulrich S. Schubert	
18. Structure-Property Relationship of Cellulose Ethers – Influence of the Synthetic Pathway on Cyanoethylation	319
B. Volkert, W. Wagenknecht and M. Mai	
19. Opportunities with Wood Dissolved in Ionic Liquids	343
Haibo Xie, Ilkka Kilpeläinen, Alistair King, Timo Leskinen, Paula Järvi and Dimitris S. Argyropoulos	
20. Advances in Cellulose Solvent- and Organic Solvent-Based Lignocellulose Fractionation (COSLIF)	365
Y.-H. Percival Zhang, Zhiguang Zhu, Joe Rollin and Noppadon Sathitsuksanoh
