

CONTENTS

Ethyl alcohol	2
Origin and chemistry	2
Taxation and legal definition	3
The alcohol-distillation industries	6
History of production	7
Industry organization	13
Corporate financing and control	16
Alcohol imports	16
Sources of alcohol	17
Fermentation processes	17
Saccharine materials	17
Molasses	17
Sugarcane	20
Sugar beets	20
Citrus molasses	21
Hydrol	22
Fresh or dried fruits	22
Cane sorghum	23
Whey and skim milk	23
Starchy materials	24
Corn	24
Grain sorghum	24
Barley	25
Rye	25
Wheat	25
Granular flour or meal	26
Potatoes	26
Sweetpotatoes	28
Jerusalem artichoke	29
Cacti	29
Manioc, arrowroot, sago, and taro	29
Cellulosic materials	30
Wood and wood wastes	30
Agricultural residues	32
Sulfite liquor	33

Fermentation procedures	35
Synthetic alcohol	37
Anhydrous alcohol	40
Butanol-acetone plants	42
Summary of origins and applications	43
Financial aspects of alcohol production	44
Plant costs	44
Equipment requirements	46
Patent situation	53
Alcohol production costs	53
Yields	56
Relative costs of alcohol from different farm crops	59
Possible improvements in alcohol processing methods	61
Byproducts and their value	67
Stillage	68
Carbon dioxide	72
Fusel oil	72
Corn oil	73
Feed yeast	73
Alcohol markets	74
Competition from other alcohols	78
Alcohol for synthetic rubber	81
Alcohol for motor fuel	85
Petroleum supplies and potential substitutes	86
Agricultural aspects	89
Literature cited	92
Sources of additional information	94
Appendix	101
List of tables	101
