

# CONTENTS

1.	PROCESSING	1
	Submerged Fermentation	2
	Ammonium Carbonate Nutrient	9
	Morpholine Additive	15
	Nitrogen Nutrient Addition After the Third Day	21
	Dual Stage Process - Low Buffer Index	27
	Adjustment of pH	32
	Crude Starch Material - Dual Enzyme Process	35
	Minimize Oxalic Acid - Pellet Formation	41
	Minimize Oxalic Acid - Alkali <b>Metal/Phosphate</b> Ratio	46
	Minimize Penicillia Contamination	51
	Counteract Foam with Fatty Material	54
	Counteract Accidental Cessation of Aeration	61
	Eliminate Bacterial Contamination	67
2.	IRON IMPURITIES	70
	Use of Copper to Counteract Iron	70
	Control Iron Cyanide Concentration	81
	Iron Cyanide Addition in a Cool Medium	96
	<b>The</b> Iron Cyanide Salt	96
	Use of Starch	98
	Toxic Organic Additive	100
	Counteract Excess Inhibitors	113
	<b>Ion</b> Exchange	117
3.	OTHER MICROORGANISMS	121
	Penicillium	121
	Trichoderma Viride	127
4.	RECOVERY AND PURIFICATION	130
	Precipitation of Dicalcium Acid Citrate	130
	<b>Concentration/Crystallization</b>	133
5.	OTHER PROCESSES	141
	Petrochemical Process	141
	<b>Allo</b> -Isocitric Acid	147
	COMPANY INDEX	154
	INVENTOR INDEX	155
	PATENT NUMBER INDEX	156
